

Xenon 1902 Color

Wireless Area-Imaging Scanner

Xenon™ 1902 Color, Honeywell's most advanced wireless area-imaging scanner, has been enhanced to deliver color imaging. Featuring Honeywell's ColorFusion™ Technology and a custom sensor that is optimized for bar code scanning, Xenon 1902 Color offers industry-leading innovation, performance and reliability, plus the freedom of Bluetooth® wireless connectivity.

Color imaging unlocks a new world of functionality. It allows enterprises to read high contrast color bar codes that were previously unreadable, such as a red bar code on a white background. Additionally, it eliminates the need to use a separate digital camera for color image capture, enabling streamlined workflow and improved productivity. Most importantly, Xenon 1902 Color provides color imaging functionality without sacrificing the aggressive bar code scanning performance enabled by Adaptus® Imaging Technology 6.0, ensuring that enterprises can meet the data capture needs of today and tomorrow.

Xenon 1902 Color incorporates a Bluetooth Class 2, v2.1 radio, enabling unrestricted movement up to 33 feet (10m) from the base. Honeywell's Shift-PLUS™ power management system provides up to 14 hours of battery life, maximizing productivity. For added convenience, a paging system helps locate misplaced scanners.

Built with durability in mind, Xenon 1902 Color can withstand up to 50 drops to concrete from up to 6 feet. An IP41-rating provides added protection. With a solid-state design backed by a three-year warranty, Xenon 1902 Color is constructed to deliver years of uninterrupted performance.

Features

- **ColorFusion Technology:** Allows color images to be captured and high contrast color bar codes to be scanned, without negatively impacting bar code scanning performance
- **Wireless Connectivity:** Bluetooth Class 2, v2.1 radio enables movement up to 33 feet (10m) from base, reduces interference with other wireless systems, and lowers total cost of ownership by allowing up to seven imagers to communicate to a single base
- **Long-Lasting Lithium-Ion Battery:** Powers up to 50,000 scans per full charge, ensuring maximum uptime
- **Image Processing Software:** Offers advanced editing functionality such as cropping, brightening, rotating and sharpening to produce high-quality digital images
- **TotalFreedom™ 2.0:** Second-generation development platform enables the loading and linking of multiple applications on the scanner to enhance image processing, decoding or data formatting functionality, eliminating the need for host system modifications
- **Remote MasterMind™ Scanner Management Software:** Provides a quick and convenient solution for IT administrators seeking to manage all scanners within their network from a single remote location
